

YUDI CHEN

+1 (608) 572-6695 | yudi.chen529@outlook.com

EDUCATION

Georgetown University, Graduate School of Arts and Sciences

MSc in Data Science and Analytics | GPA: 4.00/4.00

Washington, D.C.

Aug 2021 – May 2023

Boston University, College of Arts and Sciences

BA in Economics | Minor in Business Administration

Boston, MA

Sept 2017 – May 2021

GPA: 3.77/4.00, Magna Cum Laude

SKILLS

Programming: Python (Pandas, numpy, scikit-learn, SciPy, NLTK, SentenceTransformer, keras, TensorFlow, Pytorch), R, SQL, HTML/CSS, STATA

Data Visualization: Python (plotly, seaborn, Altair, matplotlib, wordcloud), R (ggplot2, plotly, d3.js), Tableau, PowerBI

Cloud Computation: AWS (EC2, S3, SageMaker, Bedrock), Azure (Hadoop, Hive, Spark, Databricks), GCP

PROFESSIONAL EXPERIENCE

EDETEK, Inc.

Princeton, NJ

Data Analyst

July 2023 – Present

- Design and deploy interactive dashboards using R Shiny and Plotly, featuring dynamic filtering, linked visualizations, and synchronized tables, listings, and figures (TLFs). Empower 20+ cross-functional stakeholders to monitor patient metrics, safety signals and operational performance across 5+ clinical trials in real time
- Perform statistical analyses including A/B testing, survival analysis, correlation analysis and dose-response modeling using R and Python to evaluate treatment efficacy, detect anomalies, and generate actionable insights for trial optimization and continuation decisions on 10+ ongoing studies
- Develop scalable ETL pipelines with Python to ingest, clean, and standardize raw clinical data from multiple sources and formats. Transform outputs into structured, CDISC SDTM/ADaM-compliant domains to support efficient analytics, reporting, and governance
- Build a reusable, metadata-driven validation framework in Python to apply rule-based quality checks across 20+ domains from various sponsors. Automate anomaly detection and reporting to improve data integrity, and reduce manual QC by 60%+

Georgetown Business Design & Optimization Group (BDOG)

Washington, D.C.

Georgetown University-Affiliated Consulting & Research Agency

Data Scientist Intern

May 2022 – May 2023

- Developed an operational event planning Tableau dashboard to track day-to-day university events and perform event analytics: including type, content, attendance, popularity, planner performance, and timing to optimize staffing and guide programming decisions.
- Created strategic cross-metric KPI Tableau dashboards to analyze enrollment trends, financial and scholarship allocations, fundraising performance, and competitive benchmarks, providing data-driven insights to support university leadership in resource planning and process optimization
- Implemented an automated API-based ETL pipeline to migrate and standardize multi-source HR data, define metadata mappings, implement full and delta workflows with error handling and retries, leverage multipart uploads, and design a structured database schema for scalable cloud storage
- Engineered an automated Python-SQL hybrid ETL pipeline to extract, map, and transform financial data from multiple departmental sources; performed SQL-based cleaning, aggregation, and calculations to produce comprehensive monthly reports, improving Finance Office reporting efficiency by ~20%

Detecon International

Beijing, China

Management Consulting Intern

March 2021 – June 2021

- Built Tableau dashboards to benchmark leading telecommunications and TMT companies across business models, growth strategies, IoT adoption, and service channels, enabling clients to make data-driven digital transformation decisions
- Conducted A/B testing and regression analysis in Python on Wireshark performance data to benchmark client's mobile app against competitor across five modules (content, features, performance, interfaces, operations); uncovered usability gaps and delivered 30+ optimization recommendations implemented by the product team
- Analyzed 30K+ words of interview transcripts using Python (NLP, sentiment analysis, text mining) to extract key themes and identify operational bottlenecks; created visualizations and executive-ready reports to support data-driven decisions on technology integration and digitalization for offline market strategy
